Reading Comprehension

Passage 1 (Questions 41–45) Education is not merely the process of acquiring knowledge or learning facts; it is the holistic development of an individual's personality, mind, and character. True education instills moral values, fosters critical thinking, and prepares a person to contribute meaningfully to society. While literacy rate measures basic reading and writing abilities, education goes far beyond these functional skills. In modern times, the emphasis has increasingly shifted toward technical skills, often neglecting the humanities and moral education. A balanced curriculum that integrates ethical values with scientific progress is essential for sustainable human development.

81. According to the passage, true education focuses on:
    (a) Rote memorization of factual data
    (b) Holistic development of personality and character
    (c) Technical skills exclusively
    (d) Achieving high literacy rates
82. How does the author distinguish literacy from education?
    (a) Literacy is moral, whereas education is practical.
    (b) Literacy is limited to functional reading/writing, while education encompasses broader development.
    (c) Literacy requires technical degrees, while education does not.
    (d) There is no distinction made in the text.
83. What shift has occurred in modern times according to the text?
    (a) Shift toward ethical education
    (b) Shift toward humanities
    (c) Shift toward technical skills
    (d) Shift toward environmental studies
84. The word **"holistic"** in the passage most nearly means:

85. The author advocates for a curriculum that:
    (a) Rejects technical education completely
    (b) Focuses only on humanities
    (c) Integrates ethical values with scientific progress
    (d) Prioritizes literacy over critical thinking

Reading Comprehension

Passage 2 (Questions 46–50) The industrial revolution marked a significant turning point in human history. Almost every aspect of daily life was influenced in some way. Average income and population began to exhibit unprecedented sustained growth. Industrialization led to rapid urbanization, with millions of people moving from rural areas to cities in search of factory jobs. However, this shift created severe social issues, including overcrowded housing, poor working conditions, and environmental degradation. While economic productivity soared, the immediate human cost for the working class was exceptionally high until labor reforms were introduced in later decades.
